I thought the weekly quizzes are a genius idea to keep us on our toes.
Roberto's emails have been a god-send explaining what we need to know and also helping me not devote wasted time on topics that won't be on the exams.

I liked the class and I Just don’t or did not like the quiz assignments. I had missed two for a family reunion and that automatically makes it just about impossible to get an A in that part of the class, when it’s a big chunk out of your grade. Only had a pencil, this is Math! Very Well taught!

Excellent work Roberto!!!
Roberto is one of the best mathematicians I have ever met.
His understanding of the subject, and Mathematics in general, is
exceptional and rare.

The only improvement I can suggest is there needs to
be more time allowed for exams and quizzes. Too often
was there not enough time allowed to do my best.

I was expecting to be taught applicable concepts to help me as an engineer but the math department here has consistently failed me. What's the point of teaching us Diff Eq if you're not going to teach us how it applies in the real world?

Instead of failing us on our algebra why don't you teach us how to apply diff eq to science and engineering.

Good riddance CSUS Math Department.

I found studying answers to homework posted on RamCT was most helpful. I found the class sessions unhelpful and began to rely on tutoring near the beginning of the class. I liked the quizzes, they made me keep up with the material and I also appreciate how clearly Roberto explained what material we should know for exams and quizzes. I think the class could be best improved if the proofs were skipped in class and more examples were walked through.

The compact nature of the summer course was somewhat disappointing, but the material was introduced at a reasonable pace. Excellent & very knowledgeable instructor!
