MATH 676

-

Finite element methods in scientific computing

Wolfgang Bangerth, Texas A&M University

Lecture 8.01:

Learning to use modern tools, part 1

-

Eclipse: an Integrated Development Environment (IDE)

Update: Direct project setup via cmake

Eclipse

We have been hard at work:

- In the previous two lectures, I showed how to set up Eclipse projects by hand
    - teach it manually about header file locations
    - teach it manually about Makefile targets
    - teach it manually about run configurations

- We can now do the first of these two automatically!

Let me show you how!
