

Name: _____

- For #1, #2, #3, and #4, explain your logic fully and write complete sentences. For #5, just say “True” or “False”. No partial credit is available.
- No notes, books, calculators, or other electronic devices are permitted.
- Please sign below to indicate you accept the following statement:
“I will not give, receive, or use any unauthorized assistance.”

Signature: _____

Problem	Total Points	Score
1	10	
2	10	
3	10	
4	10	
5	10	
Total	50	

- 1 (a) (5 points) Define what it means for a group G to be *commutative* (which means the same thing as *Abelian*).

- (b) (5 points) Let G be a group and let $g \in G$. Define the *order* of g (denoted $|g|$).

- 2 (a) (5 points) Draw the Cayley table (multiplication table) for $U(8)$. Is $U(8)$ a cyclic group?

Remark: Recall that $U(8)$ is the set of numbers less than 8 that are relatively prime to 8, with group operation multiplication modulo 8.

- (b) (5 points) Write $(123)(124)(24) \in S_4$ in disjoint cycle form.

3 Let G be a group, and let $a \in G$.

(a) (3 points) Define $\langle a \rangle$, the cyclic subgroup generated by a .

Practice Midterm 1A

- (b) (7 points) Prove that $\langle a \rangle$ is a subgroup of G by using the Two-Step Subgroup Test.

- 4 Let G be a group. Prove the cancellation law. That is, prove that if $a, b, c \in G$ satisfy $ab = ac$, then this implies that $b = c$.

5 No justification needed: just say “True” or “False”. No partial credit.

- (a) True or False: Let G be a group that is commutative. If $ab = ca$ for elements $a, b, c \in G$, then this implies that $b = c$.
- (b) True or False: The element 17 generates \mathbb{Z}_{99} .
- (c) True or False: Let S be a set, and let $\star: S \times S \rightarrow S$ be a binary relation. If \star is commutative, then \star is also associative.
- (d) True or False: If G is a group and $g \in G$ satisfies $|g| = 10$, then $g^{25} \neq id$.
- (e) True or False: The subset $\{R_0, H, V, D, D'\}$ forms a subgroup of $D_4 = \{R_0, F_{90}, R_{180}, R_{270}, H, V, D, D'\}$, the symmetries of the square under composition.
