

Questionnaire

1. Where are you from?
2. What are some of your interests and hobbies outside of school?
3. What's your major/concentration/minor? If you're choosing between majors, which ones are you considering?
4. Why are you taking this class? ("It's required for my degree" is an acceptable answer, but feel free to say more.)
5. What is your planned next step? That is, what are the next classes you plan to take, or job you plan to start / apply for, or grad program you plan to start / apply for, or place you want to live, etc?

6. Regarding Math 435, what are your feelings about group projects? Love them? Hate them? Put me in a random group to start? Let me choose my group? Prefer to work alone?

7. What are some of your academic interests or past classes you've liked?

8. Regarding Math 435, what are potential project areas of interest for you? Don't confine yourself. These do not need to be well-formed ideas yet, or even mathematically related ideas yet!

9. Any potential interest in projects related to finance or financial math?
