

Math 2250 HW #16

Due 11:59PM Tuesday, December 6

Reading: Hass §5.5–5.6

Problems: This assignment consists of the set “HW16” on WebWork. This homework is, strictly speaking, optional, but with the following added incentive to do it: if your score for this homework would improve your total homework score, then I will include it in calculating your final grade. *However*, if your score for this homework would not improve your total homework score (for example, if you were to get a zero), then I will ignore it.
