### Text Responses

#### Describe your classmates/peers expectations for you to contribute. Please include specifics.

I got to know many of the students in the class. They were all kind and willing to answer or ask questions to each other.

Not a lot of people spoke when asked a question, so I wish we all placed more of an emphasis on learning material together

#### Describe the workload. Please give specific examples.

There was one homework assignment due every week, this assignment typically took around 3-4 hours to complete. I found the homework to be helpful with the learning process, but occasionally became repetitive.

Workload was challenging. Anymore may have been too much. It was helpful and impactful to my learning. Especially the homework.

#### If you have any other comments about the learning environment or course, please provide them here

The learning environment was great, I was comfortable to ask questions and Jacob and the classmates were all very kind.

I loved having Jacob as my instructor. Super knowledgeable.

#### How could the timing of the feedback be improved? What might that look like? Please be specific in your comments.

Jacob provided quick and consistent feedback. He would provide corrections to any errors in our work.

N/A

#### If you have any other comments about the Instructor, please provide them here

Jacob was an amazing teacher. The class felt excited to learn and participate. Jacob went above and beyond in making the classroom exciting. He would wear funny hats on quiz days, and he would often bring the entire classroom homemade baked goods that accommodated dietary restrictions. He would also 3D print miniatures to help the classroom visualize the abstract concepts. I know from myself and other classmates that all of this helped in our learning experience this semester.

#### Describe the instructors expectations. Please include specifics.

Jacob expected all of us to attend class and be attentive as well as ask questions. If we were confused he provided many resources such as online resources and office hours.

#### How could the amount of feedback be improved? What might that look like? Please provide details. tip: it may help to put the amount of feedback in context with how much work you submitted to get that feedback.

I received clear corrections to any mistakes I made in the course. This was in the form of corrections to homework and on the exam.
